# “BeenThereDoneThat”

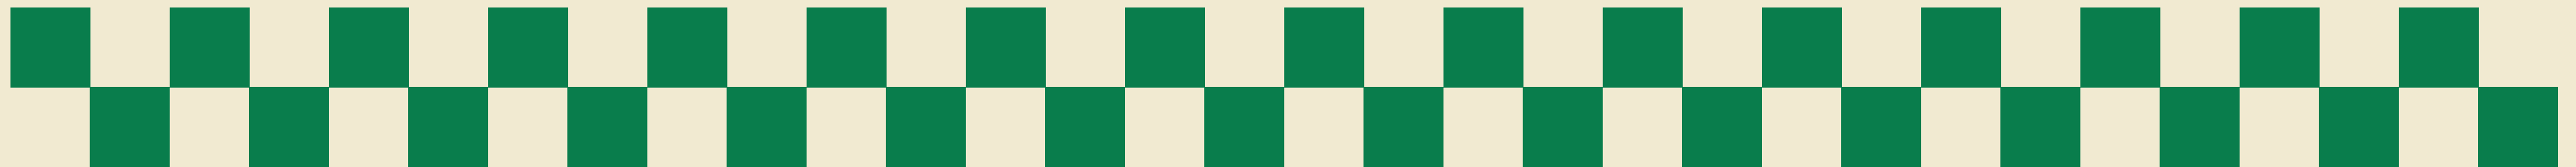

*A Journal/Photo Entry App*

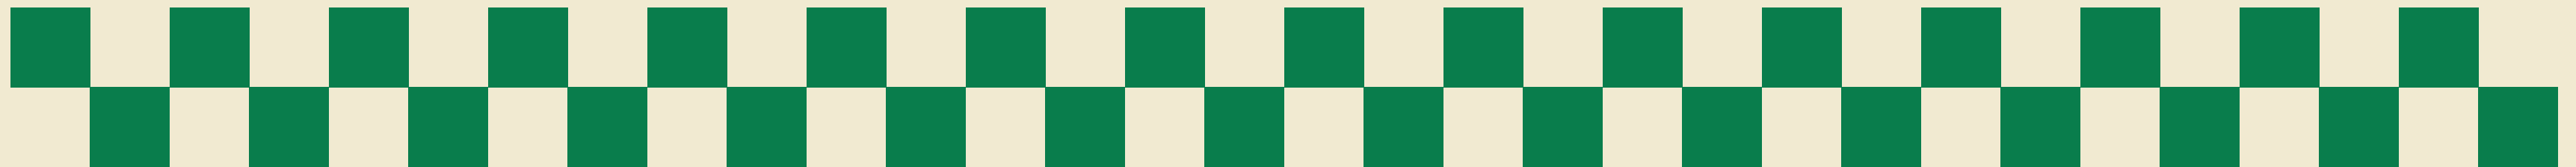

# “What is this app”

- A fun journaling and photo-taking app
- Document your day-to-day through feed “posts” and journal entries
- The essence of Instagram but without the social media aspect

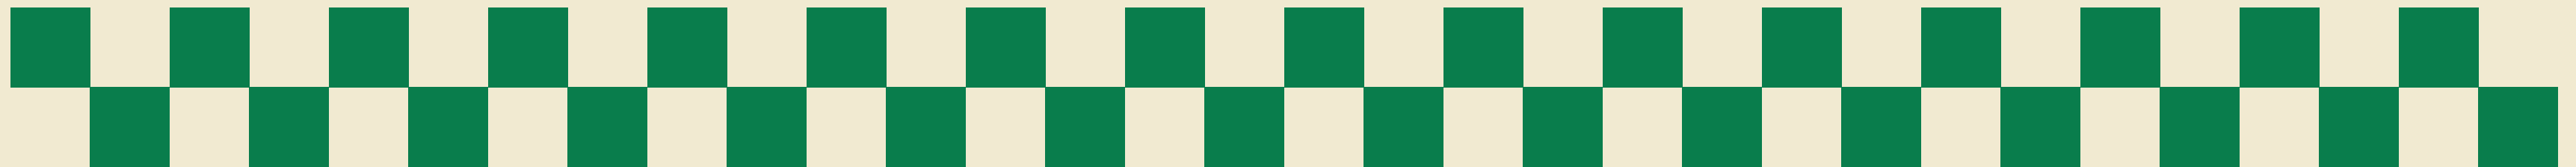

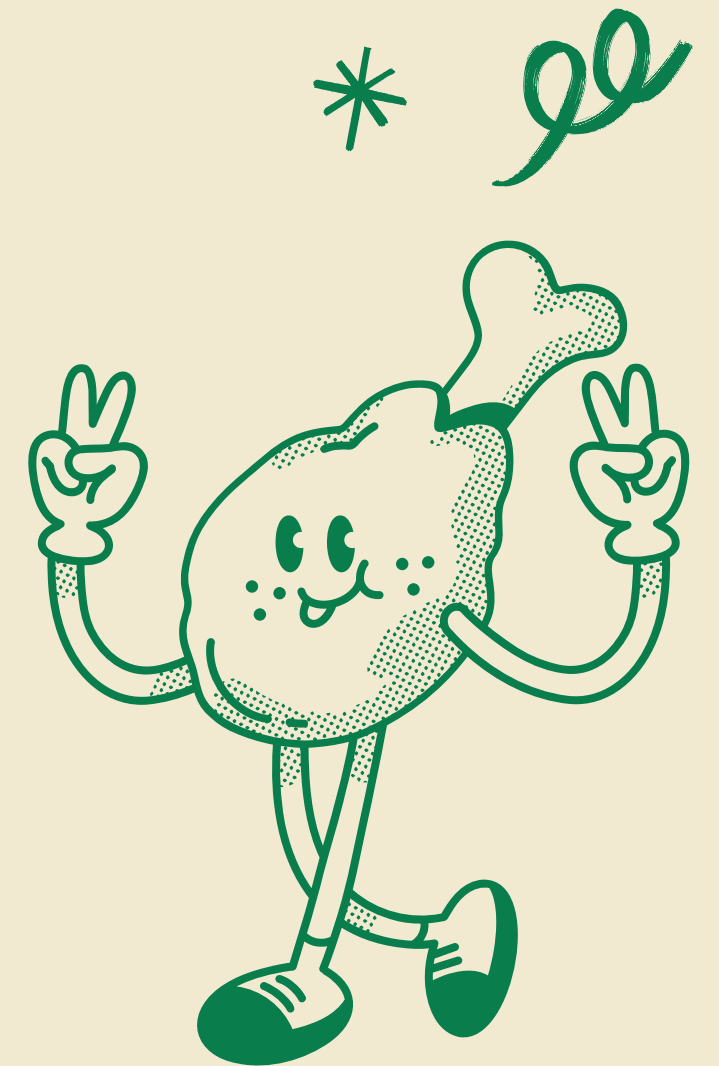

# Project Goals

- Create a personal social media (a “finsta”)
- Create a space where you can reflect on your day (pictures) or general reflection (journal)
- Creative and user-friendly space

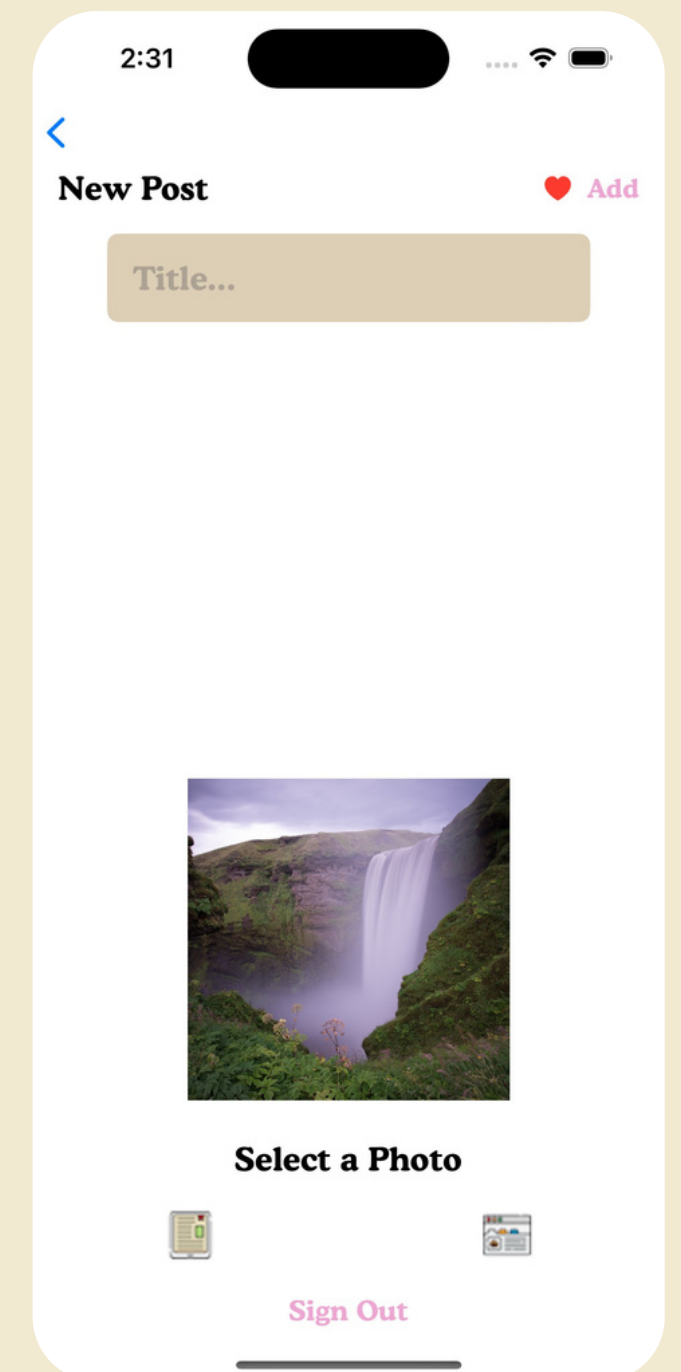

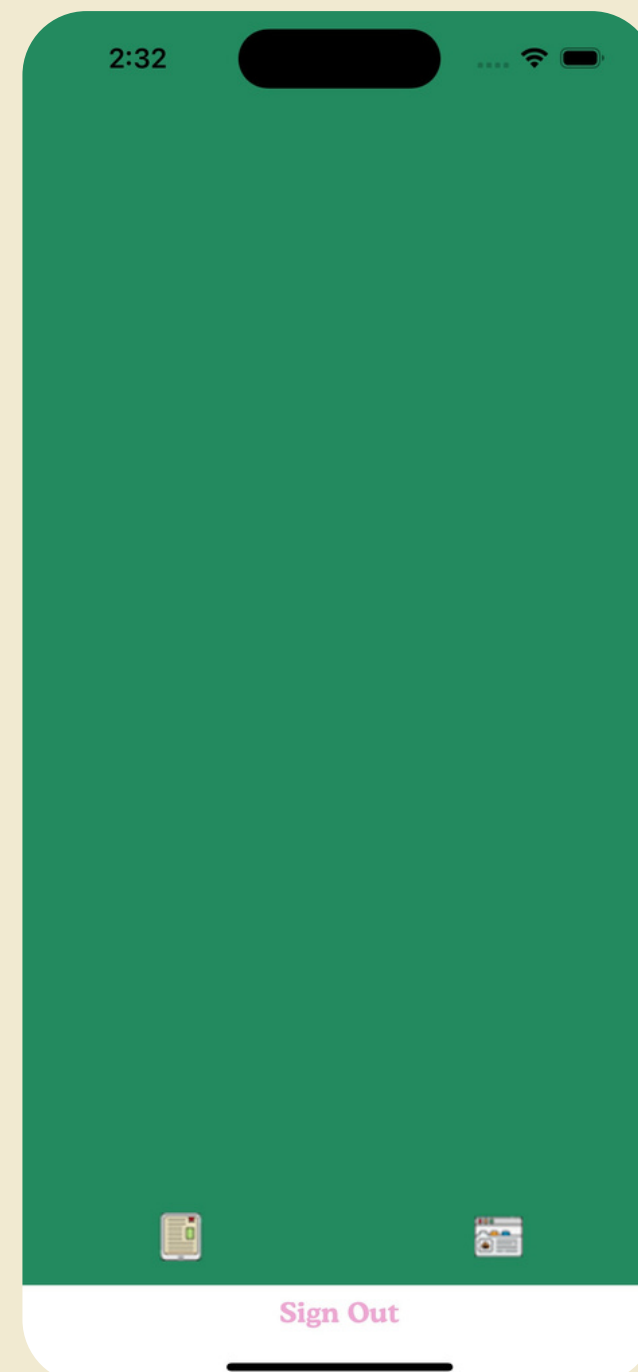

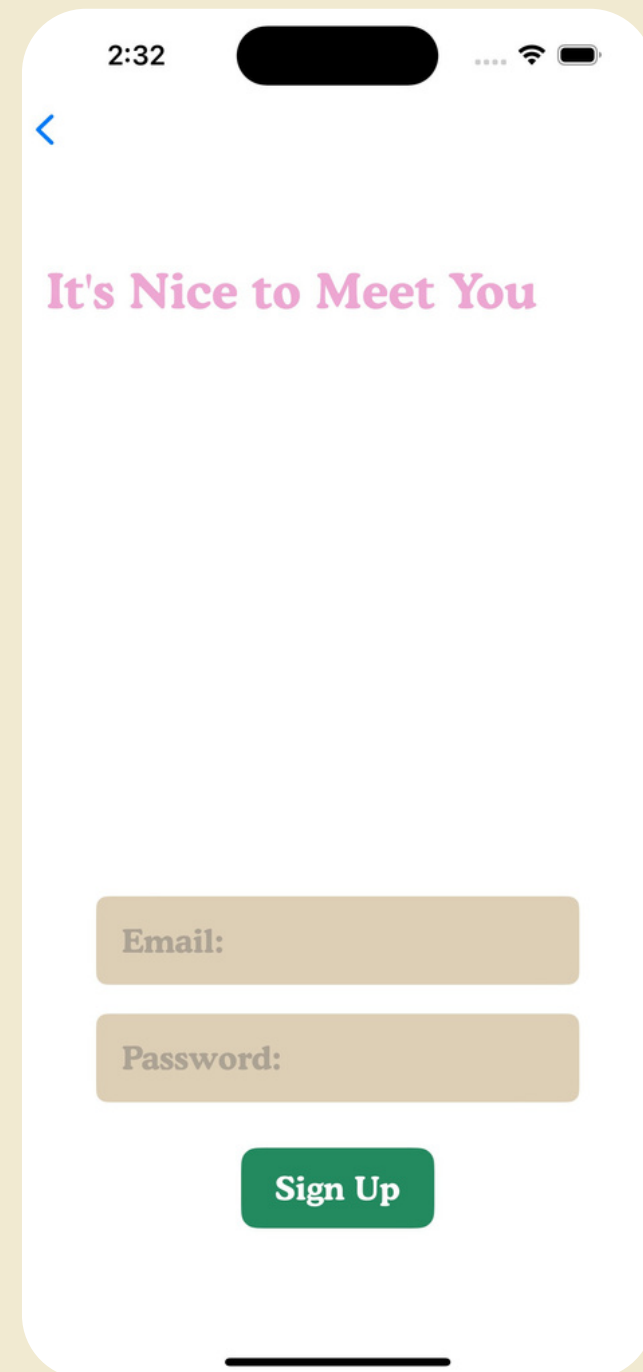

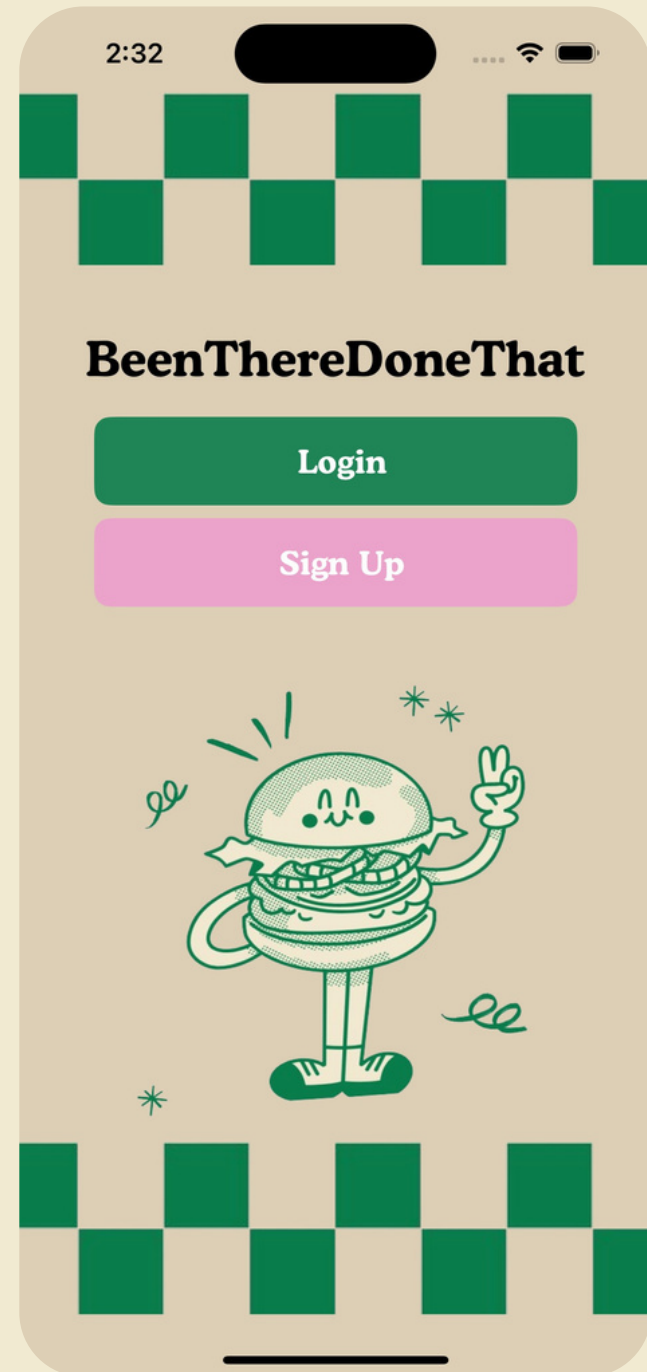

# “Why this app”

1. Personal desire for a convenient personal social media/digital journal
2. Build something that will help people document their daily lives without the pressure of social media
3. Strengthen and challenge mobile app development skills to build a creative and user-friendly application

# Current User Interface

# Project Challenges

1. Build failure when adding new frameworks to the target
2. Incorporating both Firestore and Firebase Storage in order to store photo uploads
3. UI Issues with Navigation Stack

# Project Status

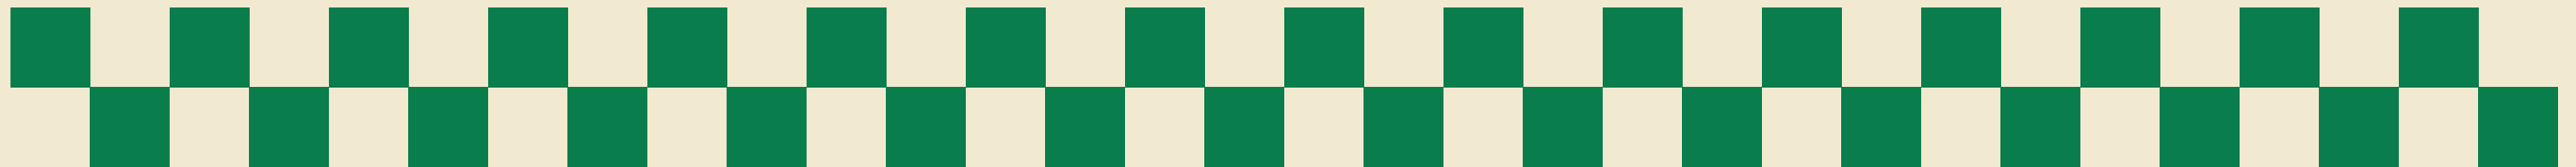

## Done:

- APP foundation (user authentication/sign-in views)
- Navigation Tabs
- Photo Grid View
- New Entry Creation

## In Progress:

1. Entry Production (journal entry)
2. Feed Filtering Feature
3. Prompt Suggestions
4. Photo Upload
  - a. Firebase Storage
